Universal Home Design Checklist

Is your home a "lifetime" home; one that will meet the needs of each family member for the duration of their life – regardless of age or physical ability? A home with universal design creates a safe environment with adapting features that will benefit all persons.

Use the handy checklist below to determine how universal design friendly your home is, and what can be done to make it more so.

The kitchen is located near the door where groceries are brought into the house The kitchen floor has a non-slip surface; rugs are non-slip or are attached to the floor using one-sided tape There is a fire extinguisher in the kitchen in an easy-to-reach place There is at least one kitchen counter that is only 36-inches high with knee space underneath Cabinets have u-shaped handles; lower cabinets have slide out shelves There is a Lazy Susan to reach difficult to access things stored on deep shelves Drawers have special easy-slide hardware Counter edges are a contrasting color and are rounded Counters are at a height that can be used while sitting Counters have leg space underneath Sink hot and cold water controls are located on the side Sinks have lever faucet handles, and anti-scald devices Sinks have lever faucet handles, and anti-scald devices Sinks have lever faucet handles, and anti-scald devices Sinks have lever faucet handles, and freezer space on the other There is a wall oven at a convenient height Oven doors swing to the side The microwave has a touch pad, with a heat-resistant counter nearby Appliances have push-button controls The stove has clearly marked controls located on the front Traffic areas throughout the house are wide enough for wheelchair use All doors have lever handles All light switches are easy push rocker style There is a garbage disposal There is a bedroom on the ground floor There is a walk-in closet wide enough for a wheelchair The shower is a walk-in closet wide enough for a wheelchair The shower is a walk-in closet wide enough for a wheelchair There is a bath-ood on the ground floor There is a bath-ood on the ground floor There is a bath-ood on the ground floor There is a bathroom on the ground floor There is a plap-proof transfer bench near the bathtub There is a plone in the bathroom Though and the should be to toilet seat There is a plone in the bathroom		YES	NO
floor using one-sided tape There is a fire extinguisher in the kitchen in an easy-to-reach place There is at least one kitchen counter that is only 36-inches high with knee space underneath Cabinets have u-shaped handles; lower cabinets have slide out shelves There is a Lazy Susan to reach difficult to access things stored on deep shelves Drawers have special easy-slide hardware Counter edges are a contrasting color and are rounded Counters are at a height that can be used while sitting Counters have leg space underneath Sink hot and cold water controls are located on the side Sinks have lever faucet handles, and anti-scald devices Sinks have ley space underneath The refrigerator is a side-by-side model; regular refrigeration on one side, and freezer space on the other There is a wall oven at a convenient height Oven doors swing to the side The microwave has a touch pad, with a heat-resistant counter nearby Appliances have push-button controls The stove has clearly marked controls located on the front Traffic areas throughout the house are wide enough for wheelchair use All doors have lever handles All light switches are easy push rocker style There is a garbage disposal There is a trash compactor There is a bedroom on the ground floor There is a walk-in closet wide enough for a wheelchair There is a bath-ond on the shower There is a bathroom on the ground floor There is a bath seat in the shower There is a bathroom on the ground floor There is a plone in the bathroom	The kitchen is located near the door where groceries are brought into the house		
There is a fire extinguisher in the kitchen in an easy-to-reach place There is at least one kitchen counter that is only 36-inches high with knee space underneath Cabinets have u-shaped handles; lower cabinets have slide out shelves There is a Lazy Susan to reach difficult to access things stored on deep shelves Drawers have special easy-slide hardware Counter edges are a contrasting color and are rounded Counters are at a height that can be used while sitting Counters have leg space underneath Sink hot and cold water controls are located on the side Sinks have lever faucet handles, and anti-scald devices Sinks have leg space underneath The refrigerator is a side-by-side model; regular refrigeration on one side, and freezer space on the other There is a wall oven at a convenient height Oven doors swing to the side The microwave has a touch pad, with a heat-resistant counter nearby Appliances have push-button controls The stove has clearly marked controls located on the front Traffic areas throughout the house are wide enough for wheelchair use All doors have lever handles All light switches are easy push rocker style There is a garbage disposal There is a trash compactor There is a walk-in closet wide enough for a wheelchair There is a walk-in closet wide enough for a wheelchair There is a bath-on on the ground floor There is a bath-on on the ground floor There is a bathseat in the shower There is a bathroom on the ground floor There is a plone in the bathroom	The kitchen floor has a non-slip surface; rugs are non-slip or are attached to the		
There is a fire extinguisher in the kitchen in an easy-to-reach place There is at least one kitchen counter that is only 36-inches high with knee space underneath Cabinets have u-shaped handles; lower cabinets have slide out shelves There is a Lazy Susan to reach difficult to access things stored on deep shelves Drawers have special easy-slide hardware Counter edges are a contrasting color and are rounded Counters are at a height that can be used while sitting Counters have leg space underneath Sink hot and cold water controls are located on the side Sinks have lever faucet handles, and anti-scald devices Sinks have leg space underneath The refrigerator is a side-by-side model; regular refrigeration on one side, and freezer space on the other There is a wall oven at a convenient height Oven doors swing to the side The microwave has a touch pad, with a heat-resistant counter nearby Appliances have push-button controls The stove has clearly marked controls located on the front Traffic areas throughout the house are wide enough for wheelchair use All doors have lever handles All light switches are easy push rocker style There is a garbage disposal There is a trash compactor There is a walk-in closet wide enough for a wheelchair There is a walk-in closet wide enough for a wheelchair There is a bath-on on the ground floor There is a bath-on on the ground floor There is a bathseat in the shower There is a bathroom on the ground floor There is a plone in the bathroom	floor using one-sided tape		
There is at least one kitchen counter that is only 36-inches high with knee space underneath Cabinets have u-shaped handles; lower cabinets have slide out shelves There is a Lazy Susan to reach difficult to access things stored on deep shelves Drawers have special easy-slide hardware Counter edges are a contrasting color and are rounded Counters have leg space underneath Sink hot and cold water controls are located on the side Sinks have lever faucet handles, and anti-scald devices Sinks have leg space underneath The refrigerator is a side-by-side model; regular refrigeration on one side, and freezer space on the other There is a wall oven at a convenient height Oven doors swing to the side The microwave has a touch pad, with a heat-resistant counter nearby Appliances have push-button controls The stove has clearly marked controls located on the front Traffic areas throughout the house are wide enough for wheelchair use All doors have lever handles All light switches are easy push rocker style There is a garbage disposal There is a trash compactor There is a bedroom on the ground floor There is a bedroom on the ground floor There is a bath-located to transfer from a wheelchair to the toilet There is a bath seat in the shower There is a bathroom on the ground floor There is a plane in the bathroom			
Cabinets have u-shaped handles; lower cabinets have slide out shelves There is a Lazy Susan to reach difficult to access things stored on deep shelves Drawers have special easy-slide hardware Counter edges are a contrasting color and are rounded Counters are at a height that can be used while sitting Counters have leg space underneath Sink hot and cold water controls are located on the side Sinks have lever faucet handles, and anti-scald devices Sinks have leg space underneath The refrigerator is a side-by-side model; regular refrigeration on one side, and freezer space on the other There is a wall oven at a convenient height Oven doors swing to the side The microwave has a touch pad, with a heat-resistant counter nearby Appliances have push-button controls The stove has clearly marked controls located on the front Traffic areas throughout the house are wide enough for wheelchair use All doors have lever handles All light switches are easy push rocker style There is a garbage disposal There is a trash compactor There is a trash compactor There is a walk-in closet wide enough for a wheelchair The shower is a walk-in Thes hower is a walk-in There is a bath seat in the shower There is a bath seat in the shower There is a bath seat in the shower There is a bathroom on the ground floor			
There is a Lazy Susan to reach difficult to access things stored on deep shelves Drawers have special easy-slide hardware Counter edges are a contrasting color and are rounded Counters are at a height that can be used while sitting Counters have leg space underneath Sink hot and cold water controls are located on the side Sinks have lever faucet handles, and anti-scald devices Sinks have leg space underneath The refrigerator is a side-by-side model; regular refrigeration on one side, and freezer space on the other There is a wall oven at a convenient height Oven doors swing to the side The microwave has a touch pad, with a heat-resistant counter nearby Appliances have push-button controls The stove has clearly marked controls located on the front Traffic areas throughout the house are wide enough for wheelchair use All doors have lever handles All light switches are easy push rocker style There is a garbage disposal There is a trash compactor There is a bedroom on the ground floor There is a walk-in closet wide enough for a wheelchair There is a bath seat in the shower There is a bath seat in the shower There is a bath seat in the shower There is a bathroom on the ground floor There is a slip-proof transfer from a wheelchair to the toilet There is a slip-proof transfer bench near the bathtub There is a phone in the bathroom	underneath		
Drawers have special easy-slide hardware Counter edges are a contrasting color and are rounded Counters are at a height that can be used while sitting Counters have leg space underneath Sink hot and cold water controls are located on the side Sinks have lever faucet handles, and anti-scald devices Sinks have leg space underneath The refrigerator is a side-by-side model; regular refrigeration on one side, and freezer space on the other There is a wall oven at a convenient height Oven doors swing to the side The microwave has a touch pad, with a heat-resistant counter nearby Appliances have push-button controls The stove has clearly marked controls located on the front Traffic areas throughout the house are wide enough for wheelchair use All loght switches are easy push rocker style There is a garbage disposal There is a trash compactor There is a bedroom on the ground floor There is a walk-in closet wide enough for a wheelchair There is a band-held shower head There is a bath seat in the shower There is a bath seat in the shower There is a bathroom on the ground floor There is a slip-proof transfer from a wheelchair to the toilet There is a slip-proof transfer bench near the bathtub There is a phone in the bathroom	Cabinets have u-shaped handles; lower cabinets have slide out shelves		
Counter edges are a contrasting color and are rounded Counters are at a height that can be used while sitting Counters have leg space underneath Sink hot and cold water controls are located on the side Sinks have lever faucet handles, and anti-scald devices Sinks have leg space underneath The refrigerator is a side-by-side model; regular refrigeration on one side, and freezer space on the other There is a wall oven at a convenient height Oven doors swing to the side The microwave has a touch pad, with a heat-resistant counter nearby Appliances have push-button controls The stove has clearly marked controls located on the front Traffic areas throughout the house are wide enough for wheelchair use All doors have lever handles All light switches are easy push rocker style There is a garbage disposal There is a trash compactor There is a walk-in closet wide enough for a wheelchair There is a bath seat in the shower There is a bath seat in the shower There is a bathroom on the ground floor There is a slip-proof transfer from a wheelchair to the toilet There is a slip-proof transfer bench near the bathtub There is a phone in the bathroom	There is a Lazy Susan to reach difficult to access things stored on deep shelves		
Counters are at a height that can be used while sitting Counters have leg space underneath Sink hot and cold water controls are located on the side Sinks have lever faucet handles, and anti-scald devices Sinks have leg space underneath The refrigerator is a side-by-side model; regular refrigeration on one side, and freezer space on the other There is a wall oven at a convenient height Oven doors swing to the side The microwave has a touch pad, with a heat-resistant counter nearby Appliances have push-button controls The stove has clearly marked controls located on the front Traffic areas throughout the house are wide enough for wheelchair use All doors have lever handles All light switches are easy push rocker style There is a garbage disposal There is a trash compactor There is a walk-in closet wide enough for a wheelchair The shower is a walk-in There is a hand-held shower head There is a bath seat in the shower There is a bathroom on the ground floor There is a slip-proof transfer from a wheelchair to the toilet There is a slip-proof transfer bench near the bathtub There is a phone in the bathroom	Drawers have special easy-slide hardware		
Counters are at a height that can be used while sitting Counters have leg space underneath Sink hot and cold water controls are located on the side Sinks have lever faucet handles, and anti-scald devices Sinks have leg space underneath The refrigerator is a side-by-side model; regular refrigeration on one side, and freezer space on the other There is a wall oven at a convenient height Oven doors swing to the side The microwave has a touch pad, with a heat-resistant counter nearby Appliances have push-button controls The stove has clearly marked controls located on the front Traffic areas throughout the house are wide enough for wheelchair use All doors have lever handles All light switches are easy push rocker style There is a garbage disposal There is a trash compactor There is a walk-in closet wide enough for a wheelchair The shower is a walk-in There is a hand-held shower head There is a bath seat in the shower There is a bathroom on the ground floor There is a slip-proof transfer from a wheelchair to the toilet There is a slip-proof transfer bench near the bathtub There is a phone in the bathroom			
Counters have leg space underneath Sink hot and cold water controls are located on the side Sinks have lever faucet handles, and anti-scald devices Sinks have leg space underneath The refrigerator is a side-by-side model; regular refrigeration on one side, and freezer space on the other There is a wall oven at a convenient height Oven doors swing to the side The microwave has a touch pad, with a heat-resistant counter nearby Appliances have push-button controls The stove has clearly marked controls located on the front Traffic areas throughout the house are wide enough for wheelchair use All light switches are easy push rocker style There is a garbage disposal There is a trash compactor There is a bedroom on the ground floor There is a walk-in closet wide enough for a wheelchair There is a bath seat in the shower There is a bath seat in the shower There is a bathroom on the ground floor There is a bathroom on the ground floor There is a bathroom on the ground floor There is a bath seat in the shower There is a bathroom on the ground floor There is a slip-proof transfer from a wheelchair to the toilet There is a slip-proof transfer bench near the bathtub There is an elevated toilet or toilet seat There is a phone in the bathroom			
Sink hot and cold water controls are located on the side Sinks have lever faucet handles, and anti-scald devices Sinks have leg space underneath The refrigerator is a side-by-side model; regular refrigeration on one side, and freezer space on the other There is a wall oven at a convenient height Oven doors swing to the side The microwave has a touch pad, with a heat-resistant counter nearby Appliances have push-button controls The stove has clearly marked controls located on the front Traffic areas throughout the house are wide enough for wheelchair use All doors have lever handles All light switches are easy push rocker style There is a garbage disposal There is a trash compactor There is a bedroom on the ground floor There is a walk-in closet wide enough for a wheelchair Theshower is a walk-in There is a bath seat in the shower There is a bath seat in the shower There is a bath soat in the shower There is a bathroom on the ground floor There are grab bars near the bathtub and toilet There is a slip-proof transfer bench near the bathtub There is a phone in the bathroom			
Sinks have leg space underneath The refrigerator is a side-by-side model; regular refrigeration on one side, and freezer space on the other There is a wall oven at a convenient height Oven doors swing to the side The microwave has a touch pad, with a heat-resistant counter nearby Appliances have push-button controls The stove has clearly marked controls located on the front Traffic areas throughout the house are wide enough for wheelchair use All doors have lever handles All light switches are easy push rocker style There is a garbage disposal There is a trash compactor There is a bedroom on the ground floor There is a walk-in closet wide enough for a wheelchair The shower is a walk-in There is a bath seat in the shower There is enough space to transfer from a wheelchair to the toilet There is a bathroom on the ground floor There are grab bars near the bathtub and toilet There is a nelevated toilet or toilet seat There is a phone in the bathroom			
Sinks have leg space underneath The refrigerator is a side-by-side model; regular refrigeration on one side, and freezer space on the other There is a wall oven at a convenient height Oven doors swing to the side The microwave has a touch pad, with a heat-resistant counter nearby Appliances have push-button controls The stove has clearly marked controls located on the front Traffic areas throughout the house are wide enough for wheelchair use All doors have lever handles All light switches are easy push rocker style There is a garbage disposal There is a trash compactor There is a bedroom on the ground floor There is a walk-in closet wide enough for a wheelchair The shower is a walk-in There is a bath seat in the shower There is enough space to transfer from a wheelchair to the toilet There is a bathroom on the ground floor There are grab bars near the bathtub and toilet There is a nelevated toilet or toilet seat There is a phone in the bathroom	Sinks have lever faucet handles, and anti-scald devices		
The refrigerator is a side-by-side model; regular refrigeration on one side, and freezer space on the other There is a wall oven at a convenient height Oven doors swing to the side The microwave has a touch pad, with a heat-resistant counter nearby Appliances have push-button controls The stove has clearly marked controls located on the front Traffic areas throughout the house are wide enough for wheelchair use All doors have lever handles All light switches are easy push rocker style There is a garbage disposal There is a trash compactor There is a bedroom on the ground floor There is a walk-in closet wide enough for a wheelchair The shower is a walk-in There is a bath seat in the shower There is enough space to transfer from a wheelchair to the toilet There is a bathroom on the ground floor There are grab bars near the bathtub and toilet There is an elevated toilet or toilet seat There is a phone in the bathroom	·		
freezer space on the other There is a wall oven at a convenient height Oven doors swing to the side The microwave has a touch pad, with a heat-resistant counter nearby Appliances have push-button controls The stove has clearly marked controls located on the front Traffic areas throughout the house are wide enough for wheelchair use All doors have lever handles All light switches are easy push rocker style There is a garbage disposal There is a trash compactor There is a bedroom on the ground floor There is a walk-in closet wide enough for a wheelchair The shower is a walk-in There is a bath seat in the shower There is a bath seat in the shower There is a bathroom on the ground floor There is a bathroom on the ground floor There is a lough space to transfer from a wheelchair to the toilet There is a bathroom on the ground floor There is a bathroom on the ground floor There is a lough space to transfer from a wheelchair to the toilet There is a bathroom on the ground floor There is a bathroom on the ground floor There is a lip-proof transfer bench near the bathtub There is an elevated toilet or toilet seat There is a phone in the bathroom			
There is a wall oven at a convenient height Oven doors swing to the side The microwave has a touch pad, with a heat-resistant counter nearby Appliances have push-button controls The stove has clearly marked controls located on the front Traffic areas throughout the house are wide enough for wheelchair use All doors have lever handles All light switches are easy push rocker style There is a garbage disposal There is a trash compactor There is a bedroom on the ground floor There is a walk-in closet wide enough for a wheelchair The shower is a walk-in There is a hand-held shower head There is a bath seat in the shower There is a bathroom on the ground floor There is a bathroom on the ground floor There is a slip-proof transfer from a wheelchair to the toilet There is a slip-proof transfer bench near the bathtub There is an elevated toilet or toilet seat There is a phone in the bathroom			
The microwave has a touch pad, with a heat-resistant counter nearby Appliances have push-button controls The stove has clearly marked controls located on the front Traffic areas throughout the house are wide enough for wheelchair use All doors have lever handles All light switches are easy push rocker style There is a garbage disposal There is a trash compactor There is a bedroom on the ground floor There is a walk-in closet wide enough for a wheelchair The shower is a walk-in There is a hand-held shower head There is a bath seat in the shower There is enough space to transfer from a wheelchair to the toilet There is a bathroom on the ground floor There are grab bars near the bathtub and toilet There is a slip-proof transfer bench near the bathtub There is a phone in the bathroom	There is a wall oven at a convenient height		
Appliances have push-button controls The stove has clearly marked controls located on the front Traffic areas throughout the house are wide enough for wheelchair use All doors have lever handles All light switches are easy push rocker style There is a garbage disposal There is a trash compactor There is a bedroom on the ground floor There is a walk-in closet wide enough for a wheelchair The shower is a walk-in There is a hand-held shower head There is a bath seat in the shower There is enough space to transfer from a wheelchair to the toilet There is a bathroom on the ground floor There is a bathroom on the ground floor There is a lip-proof transfer bench near the bathtub There is an elevated toilet or toilet seat There is a phone in the bathroom	Oven doors swing to the side

There is an elevated toilet or toilet seat There is a phone in the bathroom			
There is a phone in the bathroom	* *		
I money may a might totaline thing and targe negleads	Phones have a high volume ring and large keypads		

Smoke detectors have strobe lights	
Electrical outlets are 27-inches off the floor	
The house uses increased wattage light bulbs, with uniform lighting throughout	
Steps are a contrasting color from the surrounding area	
Stairways have handrails on both sides	
Stairways have a slip-resistant surface	
Doorways are wide enough for a walker or wheelchair	
Floors are slip-resistant	
Area rugs are slip-proof, or held in place with double sided tape	
Carpet has low pile, and a firm pad	
The front door features a ramp with handrails on both sides	
There is an automatic garage door opener	
The driveway is smooth, but not slippery	

Notes:
